The new Blackberry Classic 5G is an Android phone that will be made by the Canadian company Blackberry. The Classic has some incredible features, such as a new operating system, and a brand new Blackberry Messenger app. This phone will be built to last and has wonderful features such as a numeric keypad.

The new BlackBerry Classic 5G handset will come with its 6.5 inches Super AMOLED display, and will feature a Corning Gorilla Glass 7 for display protection. It is very durable.

The Blackberry smartphone will work on 8/10/12 GB of RAM and 128/256/512 GB of ROM. Ports include; usb-c, HDMI, Aux output, and 3.5mm audio jack. There will also be a MicroSD card to upgrade the storage up to 512GB.

The upcoming Blackberry smartphone is powered by the Qualcomm Snapdragon 888 chipset. This processor will make your phone run at lightning speed, so it's perfect for multitasking.

BlackBerry Classic Camera

This smartphone features a professional camera setup of four cameras. The back camera is Quad 108MP + 32MP + 16MP + 5MP and the selfie camera is 64MP with a flashlight. So, this is a brilliant phone that can capture your view in an advanced way.

The BlackBerry Classic 5G will feature a huge 6900mAh battery box. This is great for long-time use because it will allow you to do business related activities, watch movies, or browse the Web for hours without having to recharge.

The BlackBerry Classic 5G smartphone will feature several new security features. Some of these include fingerprint sensors, Face IDs, accelerometers, gyro, proximity, compass, barometer, and many more. There will be dual SIM card slots that allow you to use two SIM cards at once. The phone will operate on GSM/3G/HSPA+/LTE/5G network technology.

The only sad news; the BlackBerry Classic 5G will be available to certain government employees only.
